Lecture 27: Literature Reading

We will discuss the TCGA paper *Comprehensive genomic characterization defines human glioblastoma genes and core pathways*, Nature 455(23), October 2008, 1061–1068, and its supplementary methods and data (available online at <http://www.nature.com/nature/journal/v455/n7216/abs/nature07385.html>).
