

Heatmap visualization showing gene expression data across 35 genes (Y-axis) and 13 samples (X-axis). The color scale ranges from dark blue (low expression) to dark red (high expression). The heatmap is divided into two main sections by a vertical line at sample 6. The left section (samples 1-5) shows high expression (red) for genes 1-10 and low expression (blue) for genes 11-35. The right section (samples 7-13) shows low expression (blue) for genes 1-10 and high expression (red) for genes 11-35.
